

Dividing/Collecting
Controlled/Uncontrolled

MODELS:

CONTROLLED DIVIDING BREECHINGS

Possibly the most durable controlled breaching manufactured. Stainless steel shafts or spindles for strength and corrosion resistance, 'O' ring seals for maintenance free sealing, computer controlled machining ensures accurate dimensions and high quality finish. Closure by means of a positive lift valve to avoid jamming and positive close to avoid water hammer.

Controlled Dividing Breaching (SKU:053800)

Single male 70mm instantaneous inlet,
twin female 70mm instantaneous

Controlled Dividing Breaching (British) (SKU:110100)

Single male British instantaneous inlet,
twin British instantaneous outlets

Materials: Breaching body and adapters available in
heat treated cast aluminium, or LG2 gun metal.

Adaptors polished, breaching body in red painted finish.

Approx Weight: Light Alloy 3kg, Gun Metal 9kg

Options: Storz or screw threads to customer requirements

SKU:053800

UNCONTROLLED BREECHINGS

Uncontrolled Dividing Breaching (SKU:053700)

Dividing, single male instantaneous inlet,
two female instantaneous outlets, or screw
thread to customer requirements.

Uncontrolled Collecting Breaching (SKU:053900)

Collecting, single female instantaneous inlet,
two male instantaneous outlets, or screw
thread to customer requirements.

Materials: Breaching body and adapters available in
heat treated cast aluminium, or LG2 gun metal.

Light alloy polished, gun metal in red painted finish.

Approx Weight: Light Alloy 3kg, Gun Metal 9kg

SKU:053700

SKU: 053900
