

The DF130 Mobile Foam Unit is ideal for protecting oil storage and loading terminals, paint and solvent stores, boiler engine rooms and other high risk areas.

The DF130 Mobile Foam Station is ergonomically designed for rapid one-man deployment and boasts a 130 litre GRP foam tank suitable for all foam concentrates and is chemically resistant. The tank is finished in International Orange for ease of visual identification.

The unit only requires connection to a suitable pressurised water supply and when filled with 3% foam concentrate the DF130 will give an impressive run time in excess of twenty minutes with a total foam output of over 34,000 litres of finished, low expansion foam.

SKU:7717

FEATURES:

- 130 litre capacity
- Suitable for all foam components
- Highly mobile
- One man operation
- Long running times
