

PORTABLE EXTINGUISHER TROLLEY

SKU: 8416-12

**NOTE:
POLE & SIGN
SOLD
SEPARATELY**

THE FLAMEFIGHTER PORTABLE EXTINGUISHER TROLLEY IS CAPABLE OF CARRYING UP TO TWO 9L OR 9KG EXTINGUISHERS.

The Flamefighter Extinguisher Trolley is built to last using heavy duty materials including solid rubber tyres. This is the perfect solution for any situation where a permanent fire extinguisher cannot be mounted, such as construction sites, mines, festivals, markets and open air concert venues etc.

NB. 5kg CO2's are also compatible.

SUITABLE FOR:

- Construction Sites
- Petrol Stations
- Festivals and Events
- Temporary Buildings
- Heritage Buildings
- Camping Sites & Parks

This system allows fire extinguishers to be easily moved to higher risk activities, so they are readily available whenever needed. Particularly convenient on construction sites as extinguishers can be moved quite easily in changing sites during construction.

Being a sturdy, robust freestanding design, this makes light work of moving heavy portable extinguishers minimising possible injuries.

Please note: does not include fire extinguishers.
