Gunmetal 65mm (2½") MBSP Thread (SKU:60242)

Gunmetal 65mm (2½") Table D Flange (SKU:60243)

The PSL Standard Landing Valves are a water fire fighting system suitable for any position where they are required to be installed in public view. Suitable for firefighting in plants, schools, hotels and in mines etc.

PSL offer the range of STANDARD quality landing valves that fits between the Industrial and Premier range. Whilst not to the same presentable quality as our Premier range, our Standard range still offer excellent value for performance with very little difference in the aesthetics
